

Professional Certificate in  
Agile Project Management

## PMI ACP®

Agile project management is an iterative method of determining requirements of projects in a highly flexible and interactive manner. It is a philosophy of doing projects by empowering and trusting people, acknowledging change as norm, promoting constant feedback and enhance early and constant delivery of value into an enterprise. Enterprise adopting agile approaches empower those involved; build accountability; encourage diversity of ideas; allowing the early release of benefits; and promotion of continuous improvement.

This certification programme is designed for agile project management practitioner to facilitate Industry 4.0 and Enterprise 4.0 by using iterative and agile project management approach. Agile project management practitioner able to facilitate enterprise to focuses on delivering maximum value against business priorities in the time and budget allowed.

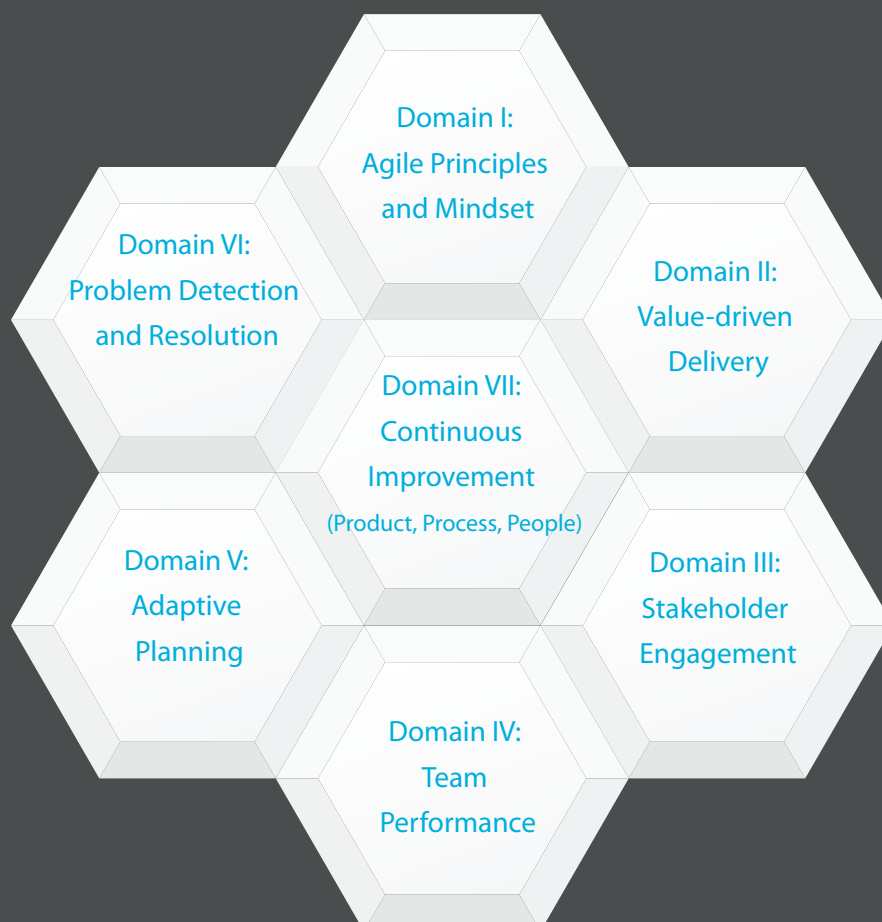

# Professional Certificate in Agile Project Management (PMI ACP®)

Professional Certificate in Agile Project Management (PMI ACP®) course offered by Informatics is designed to prepare students to achieve PMI ACP®.

Upon Completion of the course, student not only able to pass PMI ACP® exam , but also capable to make use of PMI ACP® tools and techniques at work to advance their career.

This programme covers the following core agile principles:

- Emphasis importance on individual and interactions over processes and tools, and prioritized by the team in terms of importance;
- Promotes collaborative working over contract negotiation, especially with the different stakeholders;
- Integrates planning with execution, allowing an organisation to create a working mindset that helps a team respond effectively to changing requirements;
- Promotes prototyping /working software solutions over comprehensive documentation.
